

Nambuli Presentation Guide

Nambuli Ndaitavela Ndapwoshisho Presentation Report

Portfolio Details

- GitHub username: Ndaitavela
- Email: ndaitavelandapwa059@gmail.com
- Repository: NambuliNdaitavelaPortfolio
- Live portfolio: <https://Ndaitavela.github.io/NambuliNdaitavelaPortfolio/>
- Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, wall measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on the dashboard experience, mobile interface review, dashboard cards, section headings, theme consistency, and responsive layout checks.

Evidence To Discuss

- Dashboard screen structure
- App card presentation
- Section heading consistency
- Theme and spacing review
- Static portfolio evidence assets

Challenge and Solution

The main challenge was keeping the dashboard useful and readable on mobile screens. The solution was to focus on compact card layout, clear visual hierarchy, and consistent SiteSpy branding.

Learning Reflection

I strengthened my understanding of mobile UI design, reusable components, GitHub workflow, and how to present individual contribution evidence professionally.

Presentation Notes

- Introduce SiteSpy and the construction-site workflow it supports.
- Explain the dashboard contribution area.
- Mention that older records may show Nambuli NN or Ndaitavela, but the final portfolio uses the GitHub identity Ndaitavela.
- Connect the contribution to the files listed in the evidence section.
- Discuss GitHub Pages deployment and the static portfolio structure.
